MARCH 3RD, 2020

MARCH 2020 NEWSLETTER. NUMBER 14

From the director :

Good morning everyone,

With the climat change, we all realise than we need to respect the environment whether on a personal or professional level.

We must feel concerned by this fight on a daily basis as in the long term.

In this newsletter, we are showing you all the action we have taken to help this cause.

We also want to inform you about our quality of our manufacturing and compliance with regulations regarding the non-use of certain substances.

See you soon

Laurent NANET

The month of february 2020, we have the pleasure to welcome Lucie (commande@aeva.fr) as Sales Administrative Assistant to replace Catherine Briatte and Claire (ddp@aeva.fr) as Sales Representative.

Quality is important for the trust and the respect of our customers and our company commits for our planet too.

In a sustainable development approch, we have realised various actions to minimize our impact on the environment.

- In order to save energy, we have replaced all the incandescent bulb by LED bulb. This action allowed us to save 90 % of our lighting.

- We have also saved energy with the installation of an automatic machine which limit the machines running time. This action saved us a lot of money.

- The treatment of air leaks by changing the fittings, tightening the collars ect... has permitted significant energy savings.

We are also happy to inform you that we are producing in terms of REACH and ROSH certificates.

- RoHS is a product level compliance based on the European Union's Directive 2002/95/EC, the Restriction of the Use of certain Hazardous Substances in Electrical and Electronic Equipment (RoHS).

Products compliant :

- lead;
- mercury;
- cadmium;
- hexavalent chromium;
- polybrominated biphenyls (PBB);
- polybrominated diphenyl ethers (PBDE).

- Those certificates show that our chemical substances management system complies with the REACH regulation on substances identified by ECHA (European Chemicals Agency), under cover of the information transmitted by our chemical suppliers.

Visit the next information flash for new information.
